

Introducing The Pathway Twist

Finally, standardization comes to LED!

- New “twistable” technology incorporates a standardized socket that accepts a LED twistable lamp module from any manufacturer.
- As simple to re-lamp as a conventional bulb. Easily change color temperatures and lamp manufacturers.
- LED engine and driver are included in the lamp module. There is not a separate driver.
- Future proofed design means that the fixture can be easily upgraded to newer LED twistable lamp technologies as they become available.
- Designed for use with Zhaga standardized modules.
- * Zhaga is an industry-wide cooperation aimed at the development of standard specifications for the interfaces of LED light engines. For more information, please see www.zhagastandard.org

Here you Go – Simplicity – Flexibility – Economy from Pathway, the LED Lighting Source

- Available in 4" or 6" round or square apertures
- 2700K, 3000K and 4000K color temperatures
- Currently available in 1100 lumens
- 80 CRI
- Standard 120V dimming
- Lamp Life: 25,000 hrs. at 65°C or 50,000 hrs. at 55°C
- 3 Year Warranty
- Specification sheets available online, (use keyword search, “Twist”)
