Pathway Lighting Reveals HL Series Wet Location Cylinders

OLD SAYBROOK, Conn., February 28, 2020 — Pathway Lighting Products, Inc. has added a collection of wet location cylinders to their HL Series -- currently encompassing 58 coordinating LED fixtures. These new cylinders come with a sealed LED compartment that shields against the elements and is vented for greater heat dissipation. The all-stainless steel hardware provides protection against corrosion in unforgiving environments and all-aluminum construction with powder coat finish is durable outdoors in the elements.

The wet location cylinders are offered in a choice of smooth housing or expressed fin heatsink for a Deco appearance that also affords a higher lumen output. Additionally, there are three mounting styles, three lens options, three beam spreads, a wall wash version, and three directional lighting configurations. Output levels are 1,000L – 6,000L. The 5" and 6" diameter cylinders both come in multiple housing lengths. Available in [standard or special finishes](#) with custom finishes upon request. For more information, please view our [video](#) and the [HL Series brochure](#).

All of the HL Series fixtures are compatible with Pathway Lighting's [CentralDrive™](#) and our soon-to-be-announced IRD (in-ceiling remote driver) systems.

In the CentralDrive unit, line voltage connections, control electronics, drivers, and all control and driver wiring are located in a wall-mounted panel. CentralDrive extends the life of LED drivers, the panel can be located in an easy-to-access electrical or equipment closet -- making maintenance and replacement easy and more economical should there be a failure.

About Pathway Lighting

Pathway is an innovative designer and manufacturer of specification-grade LED luminaires. Our product line is designed for commercial and institutional markets and includes: downlights, wall washers, adjustable accents, decorative pendants, and emergency egress fixtures. As an independently-owned American lighting manufacturer, we are able to provide responsive technical support, as well as fixture modifications and custom products.

CentralDrive is a trademark of Pathway Lighting Products, Inc.
